Snapshot of Agriculture in **America**

1. Find the country's statistics:

Total Population:	
Average food consumption:	(calories per day)
Arable land: (land that can be farmed)	

2. What is the country's climate(s)? (if it's a large country it may have more than one)

3. Describe the average diet of someone from this country. What foods do they commonly eat?

4. What factors (if any) limit farming in this country?

5. What factors (if any) promote farming in this country?

6. Describe what farms are like in this country. (farm size, machinery available, crops produced, types of animals they raise, etc.)

Helpful Information

Country	Population (thousands)	Total Land Mass (sq. km)	% of Agricultural Land	% of income spent on food
America	318,857	9,147,420	44.3%	6.5%
